EDUCATION

Coding Dojo of Dallas
Jul. - Oct. 2016

Belmont University
B.S. A.E.T. - 2009

PROFESSIONAL STATEMENT

I've never stopped devouring new knowledge and never will. I am tenaciously fast and stubbornly optimistic. I seek out good culture and adamantly look to improve everything I do and everywhere I go through agile practices and cutting edge technologies. I take projects from conception through design and architecture to completion and on going maintenance. I am a consultant.

WORK

MATRIX RESOURCES - Consultant II (FS Dev.)   *Dec. 2016 - Current*
Full-stack consultant/developer, starting with generating user stories, building mockups, going through revisions, choosing appropriate technologies/stack, and building out solutions from absolute beginning to end on a daily basis.

YELLOW7 - FE Dev.   *Nov. '16 - Dec. '16*
Wordpress Front-End designer and developer. Designed/coded WP site for online marketing company remotely, offered full-time at end of contract.

CODING DOJO - Graduate w/Honors   *Jul. '16 - Oct. '16*
3 Full-stacks in 3 months (Python/Django, MEAN, Ruby on Rails). Graduate in the top 1% nationally, receiving perfect scores on all tests, only student to ever graduate with Honors.

Broadcast Television - Production Engineer   *2009 - 2016*
7 Year career in international broadcast television including roles of A1, L1, V1 for stations/networks including the Trinity Broadcasting Network, Iran Alive Ministries, New Beginning Ministries, etc. as well as in several corporate theater production companies.

CLIENT PROJECTS

JobTracker2.0 - VariVerge, a Mail Presorting Company
ASP.NET MVC, Entity, Ninject, SQL, Mongo, API's, SendGrid, SignalR
Inherited from several other developers, a highly-complex MRP (Manufacturing Resource Planning), Azure based application for managing mail printing, sorting, shipping, and tracking for approximately 40,000,000 packages/yr. Specifically integrated/managed shipping and tracking data from USPS IMB services, creating *new revenue outlets* for the customer.

NorrellConstruction.com - Brochure Website
WordPress, Roots.io, Composer, Gulp, VisualComposer, CarbonFields
Built with Bootstrap and hosted on Azure, taken from mockups/revisions through to working with near-shore teams to complete the frontend, while also designing/developing the backend user interface.

UltimateLiving.com - Shopify E-Commerce
Shopify, Liquid, WebPack, SASS, Social Media API Integrations
Working from a template/theme chosen by the client, using JQuery, Bootstrap, and integrating multiple third party plugins for SEO, marketing automation, and security.
